Subject Index for Volume 21

Acetate dialysate
acetate and bicarbonate fluctuations with 513
not best choice for correcting metabolic acidosis 592
Acetazolamide
effect on bicarbonate reabsorption in alkalosis and acidosis (abst)..... 241
Acetoacetate, plasma
effect of anion infusion on..... 592
Acetohydroxamic acid therapy
for stone formers with urea-splitting infection ... 422
Acetylcholine
renal interstitial pressure and (abst) 244
Acid-base physiology 232–241
ammonia handling in, 240 (abst)..... 345
anion infusion and, in anesthetized dog 592
calcium handling in
in hypercalcemia 445, 613
in turtle bladder (abst) 238
chloride gradients and (abst)..... 236
dietary effects on (abst) 236
furosemide's effects on (abst)..... 235
hydrogen ion pump and ATPase, in turtle bladder (abst)..... 241
hypertonicity and (abst) 238
magnesium reabsorption during disturbances of (abst)..... 239
parathyroid hormone and (abst)..... 235
potassium handling in..... 345
in chronic hypokalemia (abst)..... 239
in dietary potassium depletion 402
Acidemia
during hydrogen sulfate administration (abst).... 237
Acid excretion
potassium depletion's effect on..... 402
steroids and..... 546
Acidosis
distal tubular *a.*
amiloride model of..... 8
with urine pH below 5.3 (abst)..... 144
effect on 1α- and 24-hydroxylase (abst) 131
induced by sorbent dialysis..... 416
lactic *a.*
correction of (abst) 168
pathogenesis of (abst)..... 143
metabolic *a.*
acetate not the anion of choice for 592
ammonium handling by deep nephrons during (abst)..... 233
effect on brush border adaptation to low phosphate diet (abst)..... 135
effect on phosphate uptake by brush border membrane vesicles (abst)..... 237
glutamine and ammonia metabolism in.... 439, 774
PTH's effects on serum and urine calcium during (abst) 131, 134
role of steroids in..... 546
suppression of 25(OH)D_3-1α-hydroxylase in (abst)..... 135
respiratory *a.*
effect on inner medullary collecting duct (abst)..... 233
Actinomycin D
effects on aldosterone and excretion of electrolytes (abst)..... 904
Adenosine triphosphate
during ischemia (abst)..... 256
Adenylate cyclase activity
arginine vasopressin regulation and (abst)..... 252
effect of guanine nucleotides on (abst) 287
hormonal control of, in distal segments S-55
in hormonal action on renal cells (abst) 265
in renal concentrating defect of renal failure..... 583
Adrenal hormone
and acid excretion 546
Adrenergic nervous system
effect of potassium depletion on (abst)..... 261
Ajmaline
acute renal failure due to (abst) 125
Aggregates
behavior of membranes carrying (abst)..... 283
L-Alanine transport
antibodies interacting with (abst)..... 281
Albumin
renal hemodynamics and (abst) 246
tubular absorption of (abst)..... 284
vs. hematocrit, to estimate filtration fraction 309
Alclofenac
recurrent nephrotic syndrome after (abst)..... 125
Alcohol ingestion
tubular injury by (abst)..... 254
Aldosterone
acid excretion and..... 546
chronic renal failure and plasma levels of 98
proton secretion stimulated by (abst) 240
renal protein synthesis and (abst)..... 268
role in sodium homeostasis 880, 883, 886
toad and turtle bladder's response to (abst)..... 270
Aldosteronism, primary
diagnostic criteria of (abst) 186
Alkalosis, metabolic
effect on potassium delivery to juxtamedullary end-descending limb (abst) 235
hypokalemic *m.a.*; due to metastatic bone disease (abst) 239
in hypercalcemia 613
in hyperparathyroidism (abst)..... 235
P_{CO_2} and tubular bicarbonate reabsorption in (abst)..... 237
Allografts, renal
N-acetyl-glucosaminidase determination in recipients of (abst)..... 901
C-reactive protein measurement before receiving (abst)..... 300
fatal complications in recipients of (abst)..... 901
immune response to TBM alloantigens..... 557
interstitial mononuclear cell infiltrates in (abst) .. 212
survival prolonged by donor pretreatment..... 323
by suppressor cells (abst)..... 297

Allopurinol
as cause of renal failure (abst) 143
Alport's syndrome, *see* Nephritis, hereditary
Aluminum
biology of, in health (abst)..... 152
bone content measured by impulsional polarography (abst)..... 123

calcium antagonism to correct high-renin type of (abst) ... 194
converting enzyme inhibitor for proteinuria of (abst) ... 898
sar^1-thr^8-AII in (abst) ... 193

sodium excretion in 330
unilateral *r. h.*; surgery vs. percutaneous transluminal dilatation for (abst) 188
Hypophosphatemia, X-linked
cAMP-phosphodiesterase activity in (abst) 136
Hypoprostaglandism, renal
furosemide treatment of (abst) 157
Hypotension
during dialysis, hemodynamic study 868
induced by endotoxin; renal handling of (abst)... 669
Hypothalamus
role of renal nerves in cholinergic stimulation of (abst)..... 263

Iatrogenic renal disease
cases of (abst)..... 214
Immune complexes
anti-Tamm-Horsfall antibodies and 575
circulating *i.c.*
in idiopathic glomerular disease 507
localization of, after polyclonal B-cell activation S-29
model of soluble *i.c.*, effect of complement component incorporation on (abst) 200
Immunity, cellular
and mechanisms for delayed-type hypersensitivity S-6
Immunofluoresence microscopy
new technique of tissue processing for (abst) 209
Immunoglobulin A nephropathy
in children; multicenter study of (abst)..... 151
murine model of, based on active mucosal immunization (abst)..... 198
Immunoglobulin light chain
renal handling of (abst)..... 242
Impotence
in uremia, genesis of (abst) 146
Insulin
effect of anion infusion on plasma levels of..... 592
role in tubular membrane Na-K-ATPase activity (abst)..... 266
stimulator of sodium transport and glucose metabolism (abst) 260
stimulation of urinary acidification by (abst)..... 232
therapy
effect on urinary protein pattern..... 709
graded exercise and, effect on protein excretion 725
kidney function and size before and after 683
Interstitial nephritis
antiidiotypic immunity to (abst) 203
cortical interstitial cell function in (abst) 228
Ionic charge
effect on protein uptake by tubules 354
Iron
effect on acute and chronic pyelonephritis..... 808
metabolism of, during renal cellular growth (abst) 251
tubular uptake of 354
Ischemia, renal
AII-binding to brush borders in (abst) 222
membrane phospholipid defect in (abst)..... 220
Isogeneic graft
GFR in 469

Kallikrein
tubular localization of (abst) 263
Kallikrein-kinin system
independent from prostaglandins (abst) 258
Kidney stones, *see* Stoneformers
Kidney tissue osmolality
method of measuring..... 653

Lactate, plasma
effect of anion infusion on 592
Lecithin cholesterol acyltransferase
familial deficiency of, related to nephropathy (abst)..... 121
Lectins, peroxidase-labeled
to study carbohydrate histochemistry of kidney (abst)..... 199
Light-chain disease, systemic, *see also* Immunoglobulin light chain
multiorgan dysfunction in (abst)..... 148
Limb of Henle's loop
coupled transport at (abst)..... 274
sodium chloride absorption in (abst)..... 270
thick ascending; effects of MK-196 and furosemide on (abst)..... 289
Lithium nephropathy
prospective study of (abst) 145
Lithium therapy
distal nephron function and..... 477
long-term renal effects of (abst) 159, 160
renal structure-function effects of S-13
Liver
as alternate excretion organ in uremia (abst) 227
glutamine and ammonia metabolism in, in acidosis 439
Loop of Henle, *see also* Limb of Henle's loop
effect of renal nerve stimulation on reabsorption by (abst)..... 271
Lupus erythematosus, systemic
chronic plasma exchange therapy in (abst) 147
lectin-induced lymphocyte cytotoxicity in (abst)..... 121
mechlorethamine hydrochloride therapy for (abst) 148
treated by defibrination with ancrod (abst) 212
Lupus nephritis
effect of ibuprofen on, in mice (abst) 200
glomerular thrombosis and prostacyclin deficiency in (abst)..... 210
prognostic factors in (abst) 143
therapeutic trials in, morphologic outcome (abst). 208
Lupus nephropathy
bredinin's effect on (abst) 203
Lutropin
and gonadal dysfunction of acute renal failure 84
Lymphocyte function
in zinc deficiency 827
type B; in production of immune complexes.....S-29
Lysozyme
effect on renal function and morphology (abst) .. 216

Macromolecules, organic
in urine of stone formers 379
Macula densa
role in hyperreninemia 14
Maleic acid cast nephropathy
formation and fate of tubular casts in (abst) 196
Magnesium transport, tubular
study of (abst)..... 139
Medullary blood flow
in dogs (abst)..... 243

Membrane permeability
and osmosis (editorial review) 303
Membranous nephropathy
modulation of immune complex formation in (abst)..... 195
subepithelial antigen-mediated proteinuria in (abst)..... 195
Mercuric chloride
in PGE_2 synthesis by glomerular cells S-63
Mercuric chloride nephrotoxicity
mercury's action during (abst) 218
Fanconi syndrome as protection against (abst)... 226
protection against tubular cell injury in (abst).... 226
Mesangium
insulin requirement for (abst) 262
response of Ia-positive cells to tracers (abst) 206
vasopressin-enhanced PGE_2 production by (abst) 265
Metabolic balance studies
in patients on continuous ambulatory peritoneal dialysis 849
Metanephros
glomerular matrix components in (abst)..... 196
organ culture model for development of (abst)... 195
Methylprednisolone
in pretreatment of donor to prolong allograft survival 323
Metolazone
furosemide-sparing effect of (abst)..... 148
Mineral metabolism
in patients on continuous ambulatory peritoneal dialysis 862
Mineralocorticoids
effect on potassium depletion in potassium-adapted rats (abst)..... 289
produced during adrenal regeneration (abst)..... 284
effects on acid excretion..... 546
Minimal change nephropathy
glomerular charge alterations in (abst) 227
Mitochondria
anoxia of, in perfused kidney (abst) 253
Multiple myeloma
metabolic encephalopathy of, treated by plasmapheresis (abst)..... 210
renal failure and (abst) 225
improved prognosis for (abst)..... 148
with noncryoprecipitable IgGλ M-component and proliferative glomerulonephritis (abst) 210
Muscle
degradation; vit. D and calcium studied in (abst) . 141
glutamine and ammonia metabolism in, in acidosis 439
Mycoplasma infections
in stone formers..... 422

Natriuretic factor
in sodium transport of uremia (abst)..... 262
purification of, from dog urine 339
Natriuretic hormone
in sodium balance in chronic renal disease 886
progress in purification of 339
Neoprene
use in pancreatic allograft S-46
Nephrology
diagnostic advances in 419
Nephrotic syndrome
cause of platelet hyperfunction in (abst)..... 265
children with
histopathologic variants of (abst)..... 150
long-term study of outcome in (abst) 159
persisting pneumococcal antibody after vaccination and (abst) 151
congenital; absence of glomerular basement membrane heparan sulfate in (abst)..... 210
idiopathic; mesangial IgM deposits in (abst) . 156, 211
minimal change; immunologic study of (abst).... 212
primary antibody response in (abst) 199
steroid-responsive; minimal change vs. focal glomerulosclerosis in (abst)..... 159
water immersion's effect on ..... 149 (abst), 395
Nephron
choline kinase activity along..... 877
enzyme activity along (abst) 252
genesis of, morphology (abst)..... 904
in chronic lithium therapy 477
internephron heterogeneity in rat kidney 309
role in sodium balance in chronic renal disease .. 886
single nephron filtration fraction disparity; with protein vs. hematocrit values 309
sodium homeostasis during development of 539
substrate oxidation by (abst)..... 254
Nephrotoxic serum nephritis
cellular immune mechanisms in (abst) 203
effect of thyroidectomy on (abst)..... 231
extracellular fluid volume in (abst)..... 229
factors affecting severity of injury during (abst).. 206
produced by diet deficient in essential fatty acids S-39
renal hemodynamics in (abst) 247
Noradrenaline
uptake and metabolism of, in chronic uremia 20
Norepinephrine
effect of salt intake on renal nerves and..... 316
in salt-sensitive essential hypertension..... 371
Nuclear magnetic resonance
to study kidney in vivo and in vitro (abst)..... 250
Nutrition
assessed in hemodialysis patients..... 492

Obstructive nephropathy
accelerated recovery from (abst) 218
Oliguric states
urinary nonelectrolytes in evaluation of (abst) ... 149
Omentum, rat
effect of protamine on..... 44
Opiates, endogenous
action after unilateral nephrectomy or ureteral occlusion (abst) 246
^{131}I-Orthoiodohippuran
vs. creatinine clearance (abst)..... 156
Osmolality
measured in kidney tissue 653
Osmosis
mechanism of (editorial review)..... 303
Osteitis fibrosa
PTH response to hypocalcemic dialysate in (abst) 141
Osteodystrophy, renal
atypical in diabetes mellitus (abst)..... 141
bone fluoride in (abst)..... 142
in children, quantitative histology of..... 833
role of PTH in (abst)..... 132, 137
sodium substitution used to identify frequency and severity of bone calcium deficiency during (abst)..... 130

Osteomalacia
dialysate aluminium and 411
phosphorus control via chronic hemodialysis in (abst) 166
plasma pyrophosphate levels in (abst) 230
response to vit. D S-50
Oxalate
transport in rabbit proximal tubule (abst) 287
transport in colon (abst) 135
vitamin D and, in healthy men 90

Pain control
effect on dialysis 840
Pancreatic allografts
prepared with neoprene, clinical experience when done with renal transplantation S-46
Pancreatitis
osteolytic lesions after, in dialysis patient (abst) . 166
Papillary, renal
effect of renal pelvic contraction on (abst) 247
Paraquat
renal failure from fatal dose of (abst) 125
Parathyroid gland
effect of 24, 25 $(OH)_2D_3$ on (abst) 139
Parathyroid hormone
adenylate cyclase in distal segments controlled by S-55
aluminum's effect on (abst) 138
cyclic AMP-dependent phosphorylation of brush border membrane vesicles due to (abst) 134
desensitization to (abst) 255
dialysis's effect on (abst) 140
energy metabolism of heart and (abst) 128
hypercalcemia and, in acid-base metabolism . 445, 613
in gonadal dysfunction of acute renal failure 84
metabolism of, in patients on continuous ambulatory peritoneal dialysis 862
phosphate handling and, after renal mass reduction 471
phosphaturic action of
effect of EGTA in phosphate deprivation during (abst) 133
vit. D metabolite's effect on (abst) 138
Parathyroid homone 1-34 (synthetic amide of)
in vivo vs. in vitro effects of (abst) 137
vascular effects of (abst) 139
Parathyroid implants
functional assessment of (abst) 153
D-Penicillamide
effect of long term use of (abst) 198
Perfusion, renal
protamine-heparin complex formation in 102
Peritoneum
effect of protamine on permeability and structure of 44
Phosphate, inorganic
after parathyroidectomy and phosphate depletion (abst) 130
effect of glucocorticoids on (abst) 136
in diet; and nephron changes (abst) 134
metabolic tubular requirement for 129
reabsorption of; regulators in (abst) 250
Phosphate, plasma
and dialysate aluminium in bone disease 411
Phosphate, tubular transport
ADP-ribosylation of luminal membrane and (abst) 142
after renal mass reduction 471
at brush border of subcapsular vs. juxtamedullary cortex (abst) 141
bicarbonate and fluid transport 433
effect of potential difference on (abst) 138
glucagon vs. nicotinamide in (abst) 132
metabolic requirements for inorganic phosphate in 129
mitochondrial substrates in stimulation of (abst) . 133
nicotinamide's site of action in (abst) 133
Phosphaturia
inhibited by PTH; role of PGE_2 in (abst) 131
in remnant kidney (abst) 140
Phosphorus deprivation
effect on phospholipids and glucose pathway in kidney and skeletal muscle (abst) 252
PTH and adenylate cyclase activity during (abst) . 129
tubular magnesium transport during (abst) 137
Phosphorylcholine
synthesis of, along nephron 877
Piretanide therapy
vs. furosemide (abst) 903
Pituitary-gonadal axis
in males with acute renal failure 84
Pituitary-thyroid function
in end-stage renal disease 362
Plasma exchange
benefits evaluated (abst) 209
Plasma membrane
blebbing and cell death of, role of calcium in (abst) 207
Plasma oncotic pressure
during ultrafiltration 519
Plasmapheresis
infections and; with Quinton-Scribner shunts (abst) 150
Plasma renin activity
effect of potassium depletion on 402
in chronic renal failure, role of aldosterone in ... 98
Plasminogen activator, tissue
assay of (abst) 199
Platinum, *see* Cis-diamminedichlorplatinum
Polyclonal B-cell activators
in induction of immune complexes S-29
Polycystic kidney disease
cerebral angiography not routinely indicated for (abst) 153
immunoreactive erythropoietin levels in (abst) ... 228
localization and nonsurgical control of hemorrhage in (abst) 153
Polyvinyl alcohol
mesangial cell changes due to (abst) 205
Potassium
ammoniagenesis and 345
colon absorption of (abst) 273
epithelial cell growth and (abst) 256
excretion of; aldosterone's role in control of (abst) 285
extrarenal; adrenergic control of (abst) 159
in chronic renal failure 98
in hypertension S-69
recycling in medulla (abst) 289
tubular handling of
amiloride inhibition of (abst) 290
enhanced by low lumen chloride (abst) 290
membrane properties for (abst) 283

Potassum depletion
acid-base balance and 402
DOCA's effect on the hypermagnesemia of (abst) 131
intrinsic renal adaptation to (abst) 283
renal blood flow in (abst) 244
in conscious rat 757
renin release and, in hyperreninemia 14
Potassium wasting, renal
amiloride treatment of (abst) 157
Prednisolone
altered kinetics of, in nephrotic syndrome (abst) . 903
bioavailability in renal transplant patients 621
for declining renal function of membranous nephropathy (abst) 668
Prednisone
azathioprine interaction with (abst) 292
bioavailability in renal transplant patients 621
plasma lipids, and alternate-day (abst) 294
transplantation without (abst) 295
Pregnancy
GFR during, in rats (abst) 243
test for urinary antibody-coated bacteria in 1
Prolactin
in gonadal dysfunction of acute renal failure 84
Prostaglandins
biochemical steps in synthesis of (abst) 257
in nephritis caused by diet deficient in essential fatty acids S-39
in renal concentrating defect of renal failure 583
in sodium excretion during cirrhosis 70
in uremic platelets (abst) 264
linoleic acid's effect on (abst) 260
nephron effects of (abst) 262
urine flow's effect on excretion of (abst) 266
vasopressin release and (abst) 290
water diuresis and ..... 264 (abst), 365
Prostaglandins E_2
effect on isolated perfused kidney (abst) 259
stimulated by mercuric chloride in glomerular cells S-63
Protamine-heparine complex
in renal perfusion 102
Protamine sulfate
effect on permeability and structure of rat peritoneum 44
Protein
calcium-binding, vit. D-dependent; role in renal calcium handling 765
cationic; peritoneal permeability altered by 44
dietary requirements of, in continuous ambulatory peritoneal dialysis patients 849
excretion in diabetes 709
effect of insulin and exercise on 725
uptake by distal convoluted tubule, and effect of charge 354
Proteinuria
Adriamycin-induced; glomerular permeability in (abst) 208
antibody fragments as cause of 36
fixed and reproducible orthostatic type of; 20-yr prognosis (abst) 150
hexadimethrine and (abst) 197
in diabetic nephropathy 633, 750
in maturity-onset diabetes 730
role of glycemia 709, 714
in nephroses, etiology of 565
in tubulointerstitial disease 528
low-salt diet effect on, in salt-sensitive rat (abst) . 194
mesangial and subepithelial localization of aggregates in (abst) 205
Pruritus
treated by ultraviolet light (abst) 129
Puromycin aminonucleoside nephrosis
glomerular changes in 565
hepatic canalicular junctional permselectivity in (abst) 197
Pyelonephritis
effect of iron on 808
Pyruvate, plasma
effect of anion infusion on 592

Radiocontrast dye nephropathy
mannitol to prevent (abst) 158
renal effects of, in normal subjects (abst) 155
saline or bicarbonate prophylaxis for (abst) 151
Reflux nephropathy
glomerulosclerosis and 528
Renal blood flow, *see also* Renal hemodynamics
autoregulation of, following uninephroctomy (abst) 243
in diabetes 706
in potassium-depleted conscious rat 757
Renal concentrating ability
in nonoliguric acute renal failure 583
Renal denervation
effect on renal hemodynamics (abst) 246
Renal disease
cell-mediated mechanisms in S-6
chronic; plasma aldosterone concentrations in ... 98
in diabetes; prevention and management of 780
end-stage, *see* End-stage renal disease
lithium therapy and; structure-function study ... S-13
Renal failure
quality of life after (abst) 164
Renal failure, acute
captopril and vasoconstrictor prostanoids in (abst) 226
cholemia's effect on (abst) 214
cis-diamminedichlorplatinum-induced 54
contrast-media-induced, in diabetic patients 739
endocrine gonodal function in males with 84
epinephrine-induced, effect of splenectomy (abst) 221
gentamicin-induced, in diabetic rats (abst) 219
glomerular AII receptors in (abst) 215
minimal-change glomerular lesions and (abst) 123
mitochondrial respiration and calcium kinetics in (abst) 215
nonoliguric type of
fractional excretion of sodium less than 1 in (abst) 149
renal concentrating ability in 583
role of vasopressin in (abst) 222
norepinephrine-induced; protective effects of bradykinin, mannitol, and furosemide (abst) 224
PGE_2 synthesis in S-63
phospholipid levels in (abst; 219
protection against rechallenge in (abst) 226
with diuretics (abst) 227

diagnosed by urinary β-glucosidase (abst) 905
extracorporeal irradiation to thwart (abst) 294
immunoglobulin secreting cells as indicator of (abst) 296
interleukin II and macrophages in (abst) 300
methylprednisolone dosage for (abst) 298
pheresis used in (abst) 299
vs. acute tubular necrosis, test for (abst) 296
steroid therapy
alternate-day (abst) 294, 297
drug bioavailability after 621
drug interaction in (abst) 292
without (abst) 295
survival and function of transplant
beta-2 microglobulin test for (abst) 296
blood transfusions and (abst) 295
cadaveric kidney and (abst) 294, 296
donor allograft pretreatment and, ... 323
donor-specific crossmatch on noncurrent sera (abst) 294
HLA typing in (abst) 297, 300
live related; sensitization following donor-specific transfusions for (abst) 295
retroplacental-source gamma globulin for (abst) 299
Trypanosoma rhodesiense
to induce glomerulonephritis; glomerular study of 28
Tryptophan
to prevent albuminuria and hypertension in rats with reduced renal mass (abst) 230
Tuberous sclerosis (Bourneville disease)
chronic renal disease in (abst) 899
Tubular necrosis, acute
early and late glomerular and tubular function in (abst) 152
Tubules, renal
basement membrane antigenic determinants of .. 800
in allogeneic kidney 557
collecting
aggregates and vasopressin action in (abst) 275
apical membrane properties of (abst) 280
prostaglandin and AVP action on (abst) 259
distal
adenylate cyclase controlled in S-55
electrophysiology of, in amphiuma (abst) 289
chronic lithium therapy effects on 477
potassium secretion in (abst) 277
sodium chloride secretion in (abst) 286
distal convoluted
ferritin uptake in 354
membrane transport and osmosis in (editorial review) 303
proteinuria and, epithelial antibody fragments in 36
proximal
adrenergic agonist's effects on (abst) 286
bicarbonate handling by.. 237 (abst), 273 (abst), 433
cell osmotic water permeability of (abst) 291
cytosolic free calcium in (abst) 282
dopamine receptors in (abst) 277
electrical effects of potassium and bicarbonate on (abst) 281
fluid absorption by 433
fluid reabsorption in, computer analysis of (abst) 286, 288
growth and functional properties of, in defined medium (abst) 268
inorganic phosphate's effect on metabolism in (abst) 129
membrane electrical resistance correlated with ultrastructure in (abst) 286
organic base transport by (abst) 282
potassium 42 uptake into (abst) 288
transepithelial fluid flux in (abst) 269
volume flow across intercellular channels of (abst) 278
proximal convoluted
effect of water flux on potassium transport in (abst) 278
pH and volume expansion's effect on bicarbonate absorption by (abst) 232
proximal S_3 segment
cell dimensions and structure-function in rabbit (abst) 291
proximal straight
fluid transport in, after contralateral loss of excretory function (abst) 220
sodium and rubidium in absorbate from (abst) . 268
sodium handling by, during development 539
sodium-hydrogen ion exchange in (abst) 233

Tubuloglomerular feedback
AII's effect on (abst) ... 246
changes of, with maturation (abst) ... 242
in control of nephron function (abst) ... 245
in hypertension of young rats with reduced GFR (abst) ... 248
Tubulointerstitial nephritis
antibodies in (abst) ... 208
immune mechanisms in (abst) ... 204
induced by anti-Tamm-Horsfall protein ... 575
TBM alloantigens and ... 557

Ultrafiltration
aluminum leakage from Redy sorbent cartridge in (abst) ... 178
colloid osmotic pressure during (abst) ... 175, 177
effect of decreasing plasma urea on (abst) ... 164
hemodynamics of, in conscious uremic dogs (abst) ... 165, 170
hypovolemia with (abst) ... 175
plasma oncotic pressure during ... 519
Ultrafiltration coefficient
in glomerulonephritis ... 28
variation with glomerular size (abst) ... 247
Uranyl nitrate
amelioration of nephrotoxic effects of, in untreated diabetic rat (abst) ... 223
long-term renal effects of (abst) ... 218
Urate
and bicarbonate exchange in cortical microvillus membrane vesicles (abst) ... 277
inhibition of proximal tubular transport of (abst) . 270
Urea
picomolar quantities of, measured by colorimeter 656
tubular transport of (abst) ... 280
Urease, bacterial
in stone formers ... 422
Uremia
erythrocytic deoxyadenosine metabolism in (abst) 232
low protein diets for (abst) ... 171
management of, in patients with diabetes ... 780
photoproduction of vit. D impaired in (abst) ... 140
polyneuropathy of (abst) ... 124
PTH, norepinephrine, AII, and blood pressure in (abst) ... 192
vascular response to noradrenaline in ... 20
Ureteral obstruction
prostaglandin degradation in (abst) ... 258
Ureteral occlusion
role of thromboxane A_2 in (abst) ... 266
Uridine diphosphosugar synthesis
effect of early diabetes on ... 676
Urinary bladder of toad
antidiuretic hormone's effect on (abst) ... 273
in potassium-free media (abst) ... 277
epinephrine's action on epithelia of (abst) ... 276
permeability to sodium and urea (abst) ... 270, 282
Urinary tract infections
antibody-coated bacteria in ... 1
in children; prognostic indicators in ... 659
inducing renal calculi ... 422
tests to detect upper vs. lower (abst) ... 158
Urine
acidification
after adrenalectomy in nonacidotic rats (abst) . 238
basolateral anion exchange in (abst) ... 234
hypophysectomy and, effect of growth hormone (abst) ... 238
intracellular pH in turtle bladder, related to (abst) ... 250
concentrating ability, with age (abst) ... 268
flow's effect on renal hemodynamics (abst) ... 243
kallikrein in; exogenous vasopressin and (abst) .. 256
of stone formers ... 379
P_{CO_2} of
amiloride's effect on ... 8
elevated in bicarbonate-loaded rats ... 795
renotrophic factors in; circulatory origin of (abst) 253

Vanadate
nephron sites of action of (abst) ... 272
renal renin secretion and (abst) ... 245
Vascular access for dialysis
survival of diabetes patients with (abst) ... 162
Vasculitis, systemic necrotizing
drug treatment of (abst) ... 156
Vasopressin
baroreceptor control of, in dialysis (abst) ... 264
calcium's role in release of (abst) ... 276
cellular calcium's effect on ... 813
local anesthetics' effect on (abst) ... 272
peptide antagonist's effects on (abst) ... 279
prostaglandin interaction with, in collecting tubule (abst) ... 260
Venous system, renal
intrarenal; of rat (abst) ... 245
responses to noradrenaline in chronic uremia ... 20
Verapamil
use in postobstructive nephropathy (abst) ... 261
Vitamin D and metabolites
after subtotal nephrectomy, 1-hydroxylase activity of (abst) ... 140
effect on acid-base balance (abst) ... 137
during hypercalcemia ... 445
in childhood renal diseases ... 65, 627
in normal children (abst) ... 128
in metabolic acidosis (abst) ... 130, 613
interaction with calcium ... 146 (abst), 765
in healthy men ... 90
liver and kidney extracts of (abst) ... 133
Vitamin D therapy
effect on PTH and skeleton (abst) ... 231
for nephrotic syndrome (abst) ... 905
uremic osteoid response to ... S-50
Volume regulatory mechanisms
diurnal variations in (abst) ... 280

Water diuresis
role of renal prostaglandins in ... 365
Water immersion
effect on renal function in nephrotic syndrome .. 395
sodium handling in (abst) ... 261
Water transport
osmosis and (editorial review) ... 303

Yeast infections
in stone formers ... 422

Zinc deficiency
lymphocyte and granulocyte function in ... 827
Zinc therapy
for impotence in dialysis patients (abst) ... 167
